

NxPhoto_JPG Manual Version 1.0.1

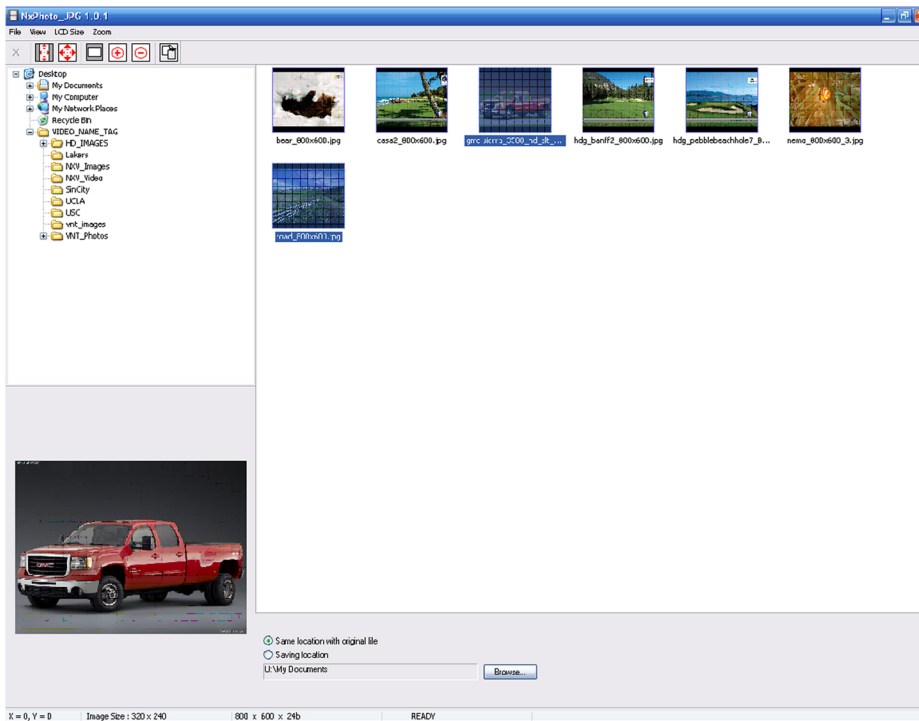

Converts from JPEG • BMP • GIF Images

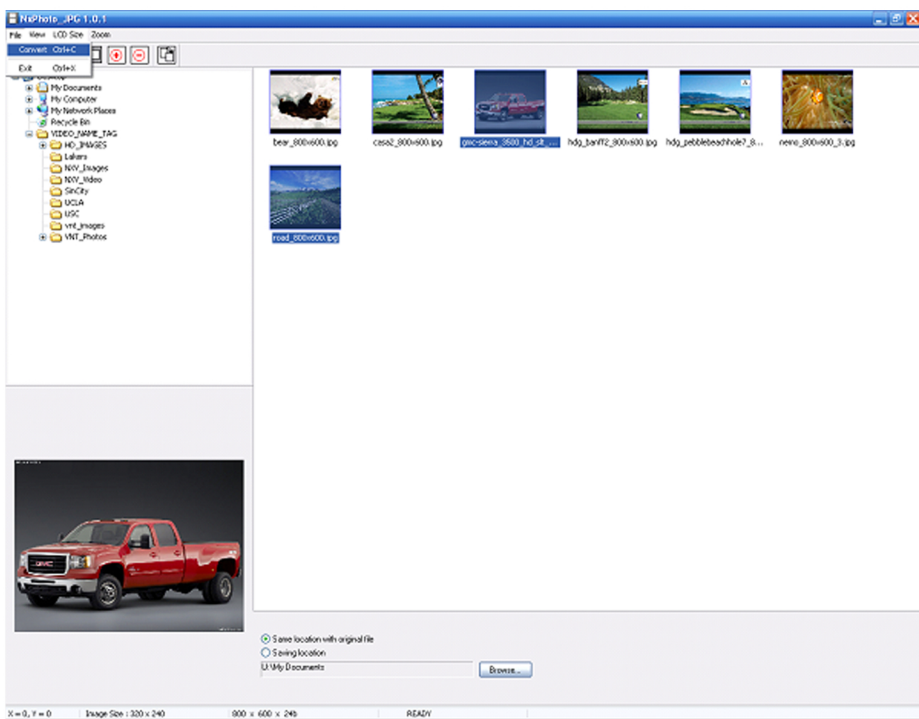

1. Open NxPhoto Program

2. Select folder that has images you wish to convert

3. Select the images by clicking on them. Press Ctrl to select more than one image at a time.

4. Confirm what location you would like the converted file to be saved to. Then from the file menu, select Convert.

5. Loading you images and videos onto you Video Name Tag.

- A. Plug in you VNT via the supplied USB into your computer.
- B. Create a folder/s on your VNT labeling them by numbers. Example - label your first folder "1", your second folder "2", ect. depending how much content you have.

The fast forward button on you VNT, pressed once will move into your next folder. Holding it down will fast forward through your video.
