

# Nxv Converter Version 4.10 • For Video

Converts & Compresses • AVI • MPEG • WMV

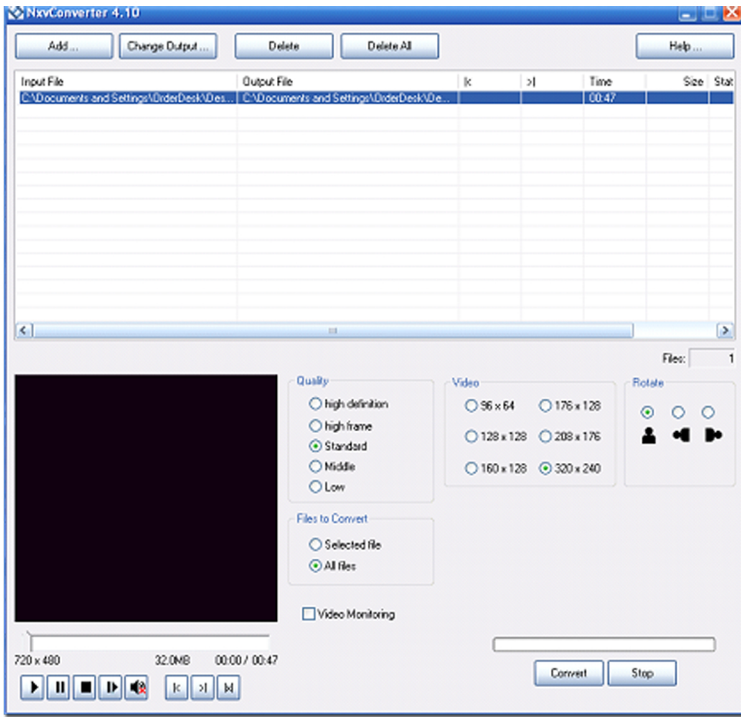

Please Note: \*Output all video files with audio before converting with Nxv Converter. \*Upload content from PC w/USB 2.0

1. Open NxvConverter Program

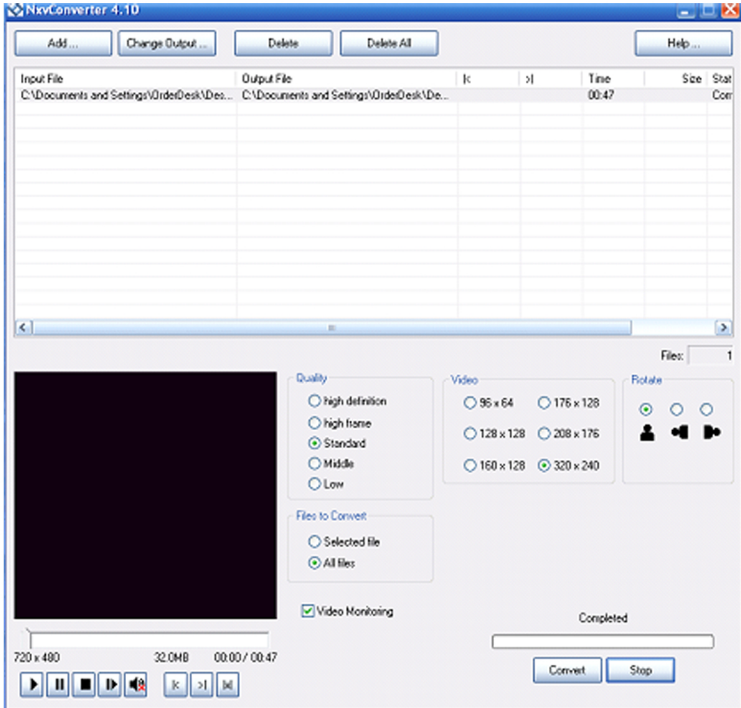

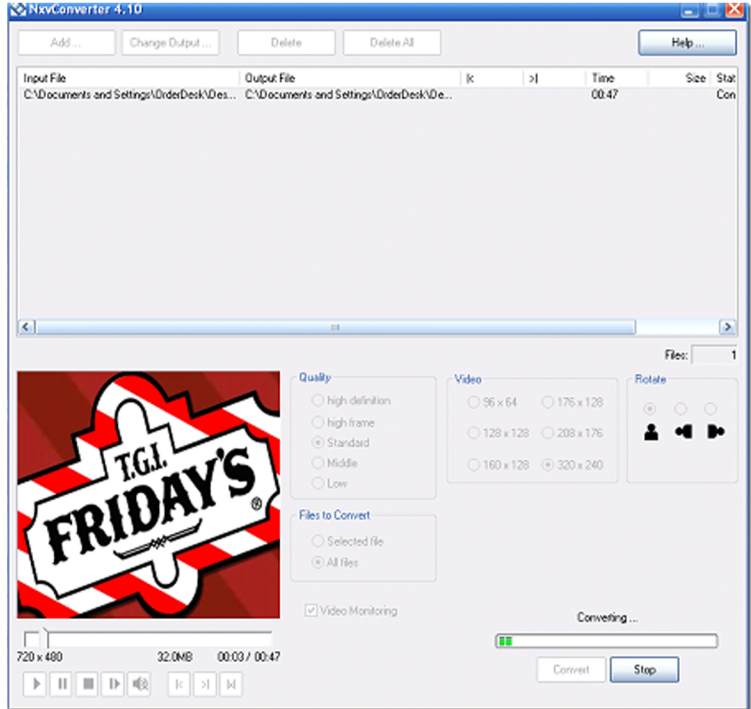

2. Select Add and find the video on your computer that you wish to convert.

3. Once the video is selected you will see the location of the Input file. You can also change where the final file is outputted to by selecting Change Output.

4. Then select Video Monitoring before selecting the (Convert Bottom) of your screen if you would like to watch the conversion of your video.  
*Note: You will not be able to rotate video to portrait using the rotate selection in this program. Please rotate your video before Inputting the file into the NxvConverter Program.*

5. Once the file is converted it will say Completed at the bottom of your screen. Unless you have changed the output the converted file will be in the same location as the original.
