

Displays that deliver, no matter the message.

Professional LCD Displays

Deliver your message with maximum impact, no matter where you're delivering it. Samsung professional LCD displays offer a solution for every situation. Whether you want to reach people in a hotel lobby or in a packed arena, whether it's in a quiet restaurant or on a busy street corner, Samsung displays are engineered for maximum impact in every situation. We pour billions of dollars into R&D each year, creating innovative technologies that deliver incomparable images, easy-to-use features, economical solutions and critical reliability. They're professional communication displays that will deliver your message. No matter where, no matter what.

Samsung Professional LCD Displays

Samsung professional LCD displays are engineered for maximum performance and reliability. The better your displays look, the better you look. No matter what your application, there's a Samsung display that's perfect for you.

UX(n) Series Displays

400UX, 400UXn, 460UX, 460UXn

Utilizes an ultra-thin bezel for virtually seamless video walls. Its DID panel enables higher brightness and longer operation.

High Ambient Light Conditions

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Marquees, gas pumps, other outdoor signage

Transportation: FIDs, multi-use informational displays at airports, railway and bus stations, fixed highway stations

Financial Exchange: Stock, commodity, currency and other financial exchange establishments

DX(n) Series Displays

400DX, 400DXn, 460DX, 460DXn, 520DX, 520DXn, 570DX, 570DXn, 700DXn, 820DXn

Designed for users requiring a robust set of features, with impressive technology such as the thin bezel and the DID panel, enabling higher brightness and longer operation.

High Ambient Light Conditions

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Marquees, gas pumps, other outdoor signage

Control Room Simulation: High-performance military applications, simulators for training and entertainment

Airline	Arrivals	Time	Flight	Gate	Status

American	San Francisco	3:04	820	E6	on time
Delta	Burbank	1:32	2233	R8	on time

CX(n) Series Displays

400CX, 400CXn, 460CX, 460CXn

Created for those environments that require a professional TV product with built-in speakers designed for long hours of use with a consumer look and feel.

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Education: Classroom applications at universities, colleges and other schools

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

MP(n) Series Displays

320MP, 400MP, 400MPn, 460MP, 460MPn

For demanding commercial applications requiring greater flexibility, enhanced display management and improved screen performance.

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Education: Classroom applications at universities, colleges and other schools

Rental & Staging: Rental and transportable displays for staging, concerts, trade shows and other events

FP(n) Series Displays

400FP, 400FPn

For demanding commercial applications requiring greater flexibility, enhanced display management and improved screen performance with 1080p full HD support.

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Education: Classroom applications at universities, colleges and other schools

Rental & Staging: Rental and transportable displays for staging, concerts, trade shows and other events

FX(n) Series Displays

400FX, 400FXn

A cost-effective, best-in-class solution with slim connectivity and 1080p full HD support.

Education: Classroom applications at universities, colleges and other schools

Conference Rooms: Conference and training rooms

MX(n) Series Displays

320MX, 320MXn, 400MX, 400MXn, 460MX, 460MXn

A cost-effective, best-in-class solution with flexible performance that's well-suited to display any type of information.

Education: Classroom applications at universities, colleges and other schools

Conference Rooms: Conference and training rooms

Set Back Boxes

SBB-NT, SBB-DT

SBB-NT adds networkability to MX, MP, CX, FX, FP and 520DX series displays, while SBB-DT adds HDTV tuner capability to MXn, MPn, FXn, FPn and 520DXn series displays.

Versatile Display Control and Content Management

All Samsung network displays feature built-in PCs. Embedded with Windows XP, they offer advanced security and the ability to be controlled remotely. The built-in PC also allows easy content control over your existing network with Samsung MagicInfo™ software. It's a more streamlined solution that means you don't have to run extra PC wires and cables, and installation in any location is made easier.

Samsung MagicInfo™ Software Solutions

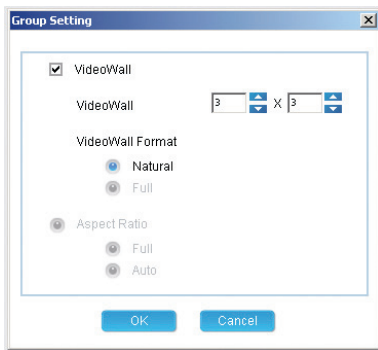

Samsung's goal is to give you the tools you need to perform your job better and easier. We created Samsung MagicInfo™ software to do just that. Built-in MagicInfo™ Pro-Extension and MagicInfo™ i software let you control and detect the conditions of the displays by giving you remote management capability via LAN/WAN. MagicInfo™ offers a powerful Author Tool for user-friendly content development. Open API-based architecture enables customization to meet specific customer needs. And for those who want to integrate their own software solution with MagicInfo™ software, the SDK (System Development Kit) makes it easy.

MagicInfo™ Pro-Extension

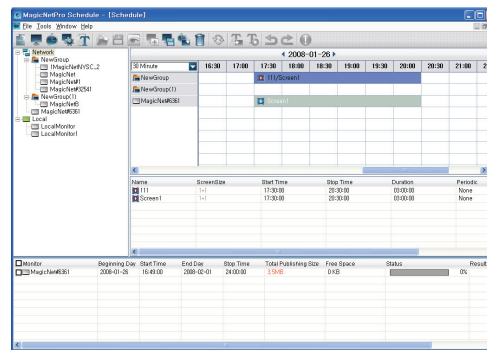

MagicInfo™ Pro-Extension software gives you easier video wall control with greater functionality. You can group a certain number of displays and control their content as one entity. That makes it easy to display different content in different locations, such as on different floors or different areas of a hotel or retail center.

MagicInfo™ Pro-Extension software also gives you RSS feed capability. Display stock market quotes, weather updates, scores and more.

And for greater versatility, you can run linked applications within the original application's window, such as running a video within a PowerPoint presentation.

Simple Video Wall Management

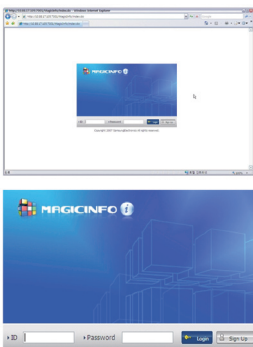

Groups can be Controlled as Single Entities

MagicInfo™ i

In addition to all the benefits of MagicInfo™ Pro-Extension software, MagicInfo™ i offers a more user-friendly drag-and-drop content development tool.

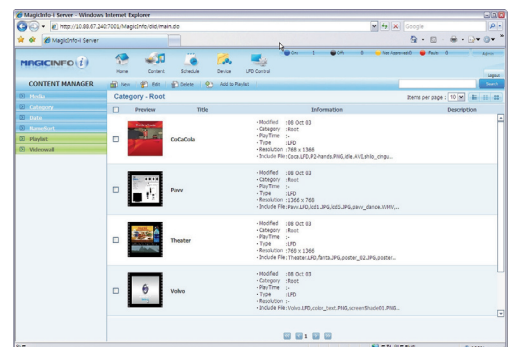

MagicInfo™ i is also a web-based server, offering several significant advantages. You can access the server and control your displays from anywhere. You can upload content from anywhere.

When you invest in a premium information display, you don't want to have to replace it anytime soon. That's why we engineered advanced, long-life cooling technologies into our DID panels, found in our UX/UXn, UXn-M, UXn-UD, UTn-M, DX/DXn, TSn (touch screen), DR/DRn (high brightness) and DRn-A (high brightness with housing) displays.

No Mura Effect from Localized Heat

No Image Retention

No Burn-in

Vertical Operation

Horizontal Operation

Advanced Cooling Design for Extended Operation and Longer Life

You can run your Samsung DID display 24 hours a day, without worrying about reliability. Internal operating temperatures run cooler, meaning longer run times and longer component life. A heat protection plate between the lamp and LCD panel protects the panel from heat. A heat dissipation plate behind the lamp eliminates hotspots. An increased gap between the lamp and diffuser plate improves airflow. The built-in fans aid airflow, and dust filtration prevents heat-trapping dust build-up.

Anti-Image Retention Technologies

Four different types of anti-image retention can be set to be activated automatically throughout the day, helping to contribute to longer panel life.

Built-in Fan

Typical displays force you to choose either vertical or horizontal operation. Samsung installs three fans, to give you the option of a horizontal or vertical display, while always providing maximum cooling.

Temperature Control

A user-adjustable temperature control protects your Samsung display. Set the temperature control, and if the temperature gets too high, the display automatically turns off.

Innovative Power Savings

Samsung's DPMS (Digital Power Management System) mode is economical and ecologically friendly. MX/MXn models use just 5W of energy, and only 2W in Energy Saving mode. DX/DXn models use just 2W, and only 1W in Energy Saving mode.

Superior Pictures Through Superior Technologies

Stunning Full HD 1080p

Full HD 1080p support gives you the highest resolution digital images available. Images displayed at 1920 x 1080 employ 1.5 times more scanning lines than conventional HD resolution, and are twice the resolution of standard HD.

HD Ready

The first thing you'll notice about Samsung HD displays is the exceptional clarity on a wide screen. With Samsung's cutting-edge technologies, HD displays deliver incredible, razor-sharp images.

Ambient Light Sensor

Samsung displays can measure the room's ambient light, then adjust for a continually optimized picture.

S-PVA Technology

This exclusive Samsung technology is another reason we're the number one display manufacturer in the world. Our S-PVA (Super Patterned multiple domain Vertical Alignment) technology enables superior contrast, excellent response time and excellent transmittance. S-PVA splits the cells and incorporates two TFTs per cell, as opposed to the industry standard of one TFT per cell. The result is the most accurate color reproduction from any angle.

Nearly perfect vertical alignment of the liquid crystal results in extremely fast response to voltage. It also produces a completely black state, yielding a very high contrast ratio.

Dynamic Contrast

With dynamic contrast, the display analyzes picture input signals and continually adjusts the lamp's intensity to provide optimum contrast. The result is brighter brights without blowing out the whites, and richer, deeper blacks that hold and display fine detail.

Fast Response Times

Super-fast response times eliminate ghosting, smearing and trailing. Moving type and motion graphics will always be sharp, clear, precise and compelling.

High Brightness Levels

With high brightness levels, Samsung LCD displays can be clearly seen, delivering your message even in brightly lit indoor or outdoor areas.

Extremely narrow domain boundaries increase cell aperture ratio, which allows more light to pass and increases brightness.

Professional LCD Displays With Built-In TV Tuner

Samsung CX and CXn displays are professional displays. They offer features that consumer TVs typically don't need, and are built to deliver reliable high performance even under the harshest conditions.

Commercial Durability

Samsung commercial displays are designed for continuous use. They feature anti burn-in and anti image-retention circuits to minimize the possibility of static images damaging the unit. They also have a much higher MTBF (3x) or 50,000 hours for all circuitry. Their enhanced life expectancy is due to innovative cooling and dust prevention improvements that enhance ventilation.

Commercial Input Options

Samsung commercial displays feature an industry standard RS-232 external control/connector interface.

Picture Calibrated to Commercial Inputs

Samsung commercial displays are designed to integrate with personal computers first and consumer television sources second. In these units, the LCD backlight covers a wider spectrum of colors that is necessary for PC source integration. The internal scaler in commercial displays allows for multiple PC sources and formats that can be used to create a dynamic business environment. They also offer more adjustments in more settings to optimize picture quality versus consumer displays. The processor also produces a full grayscale with linear color tracking of all signals from black to white. This ensures that the color and brightness is adjustable across a wider range.

Enhanced Security

Samsung commercial displays have features to protect the unit, including IR Lock Out. Controls on the front of the display can be locked, while additional buttons for other functions are usually hidden to prevent unauthorized access.

CX/CXn displays deliver top performance, whether mounted vertically or horizontally.

Consumer displays are only designed to be mounted horizontally.

Flexible Installation

Samsung commercial displays feature the industry standard VESA designed connections, making them compatible with mounting brackets from a wide variety of providers. The units can be orientated in either landscape or portrait mode at any time, which allows for innovative placement possibilities. These units are simple and inexpensive to install.

Professional Power Supply and Shielding

Samsung commercial displays feature a heavy duty power supply that adapts to varying voltage levels. Displays offer protection from electro magnetic interference (EMI) from other sources such as cell phones or computers, that may disrupt the operation of the unit.

Longer Warranty

Samsung commercial displays offer 3-year onsite parts and labor warranties.

SBB-DT

SBB-DT adds HDTV tuner capability to MXn, MPn, FXn, FPn and 520DXn series displays.

Analog and Digital Tuners

The SBB-DT set back box features built-in analog and digital tuners that let you receive and display 720p and 1080i high-definition television broadcasts. Coaxial and HDMI connections give you all the options you need to pull in all the content you want.

Caption Support

The more information, the better. With the SBB-DT set top box, you can access and display real-time caption content such as weather reports, stock updates, flight schedules and more.

SBB-NT

SBB-NT adds networkability to MX, MP, CX, FX, FP and 520DX series displays.

Instant Networking

Controlling content is even easier when you can do it over your network. Install the SBB-NT set back box, plug the display into your network, and control content with a few simple clicks.

Expanded Connectivity with Set Back Boxes

Samsung set back boxes give you the option of adding full DTV access or networking capability to your display. Simply attach the module to the back of the set, and you're instantly upgraded.

Versatile Connectivity

Enhanced Connectivity with HDMI

Select Samsung displays offer enhanced connectivity, with PC inputs (VGA/DVI/BNC/Ethernet/USB 2.0) and Video inputs (CVBS/HDMI/Component). You can connect a variety of devices, including DVD, PC, audio systems, Ethernet hubs and external memory.

Full Connectivity with HDMI

Select Samsung displays offer full connectivity, with PC inputs (VGA/DVI/BNC) and Video inputs (CVBS/HDMI/Component). You'll have unlimited flexibility in your content source.

Slim Connectivity with HDMI

Select Samsung displays offer cost-effective slim connectivity with PC inputs (VGA/DVI) and Video inputs (CVBS/HDMI). You get the connections you need, without paying for the ones you don't.

- a. POWER IN** Connect the supplied power cord.
- b. RS-232C**
IN: Used for the MDC function when connecting PC or RS-232C output of another display.
OUT: Used for the MDC function when connecting with RS-232C input of another display.
- c. DVI/PC/HDMI AUDIO IN** Connect to the audio output jack on your PC or DVI. AUDIO is an audio input jack for PC1 and PC2 modes.
- d. HDMI IN** Connect to the HDMI jack of a device with HDMI output. This input can also be used as a DVI connection with separate analog audio inputs. An optional HDMI/DVI cable will be necessary to make this connection.
 When using an optional HDMI/DVI adapter, the DVI analog audio inputs on your display allow you to receive left and right audio from your DVI device.
- e. DVI IN** Connect to the video output jack of a device with DVI output.
- f. PC IN2** Connect for RGB HV video signal input from the PC. (PC Mode means PC1/PC2 mode using RGB1 [PC1] and RGB2 [PC2].)
- g. DC OUT (5V/1.5A)** Connect this to the power connector of a TV tuner box or network box.
- h. AV (Video) IN** Connect the video terminal of your monitor to the video output terminal of the external device using a video cable.
- i. AV (AUDIO L/R) IN/OUT**
i-1 IN: Video and audio inputs for external devices, such as a camcorder or VCR.
i-2 OUT: Outputs for external devices.
- j. COMPONENT AUDIO IN (L/R)**
- k. BNC/COMPONENT IN/OUT**
BNC (Analog PC): Connects to the R, G, B, H, V ports.
Component: Connects to the PR, Y, PB ports.
- l. AV (VIDEO) OUT/IN**
- m. AV (S-VIDEO) OUT/IN**
- n. EXTERNAL SPEAKERS (L/R)**
- o. Ethernet** Connect to a network hub or plug directly into your LAN/WAN.
- p. USB 2.0** Connect a USB device like a removable storage drive.
- q. RGB OUT** Applicable to MxN, FxN, MPn, CxN and 520DxN displays only.

Easier Display Control

Multi Display Control (MDC)

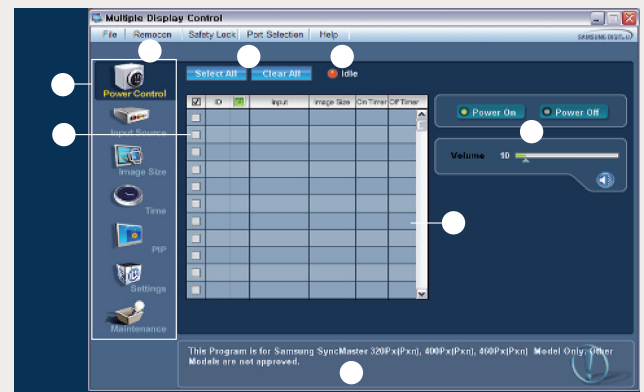

The more control the better, especially when it's easy. The built-in RS-232C interface allows you to control up to 25 displays from your PC with Samsung's MDC software, using the serial port (DB-9) of the display. In addition, MagicInfo™ Pro allows unlimited display control via the network (RJ45 port) controlled by the MagicInfo™ Pro server/PC. Just install the free MDC software supplied, list the units to be controlled, and click on the functions you want to control. It's that simple.

MDC Software Interface

1. Main Icons: Use the main icons to switch to each screen.
2. Select Button: Click Select All or Clear to select or clear all displays.
3. Display Selection: Select a display from Display Selection.
4. Info Grid: Use Grid to view brief information on selected display.
5. Control Tools: Use Control Tools to control displays.
6. Remocon: Allows you to enable or disable the remote control signal receiving function of the display unit.
7. Title: The current title to be controlled is displayed.
8. Comm. Status: Indicates the communication status between the MDC and the display.

MDC Software Screen Shot

Samsung Service and Warranties

Your Samsung LCD information display was engineered to last a long time. But in the event you need us to help with a repair, we'll be there for you.

Three-Year On-Site Warranty

Samsung professional LCD displays come with a three-year parts and labor warranty. It includes on-site repair or exchange.

Extended Warranty

Samsung can extend your warranty period for either a one or two-year period for an additional cost. You'll enjoy Samsung protection for up to five years.

Fast Track Warranty Service

For those who can't wait for standard warranty turnaround times, Samsung offers Fast Track service. With Fast Track, your display will be replaced the next business day after a service ticket is opened.

White Glove Service

Samsung White Glove service is also available, for a completely painless experience. For an additional fee, our technicians will deliver and install your Samsung display, walk you through its basic features and functions, and answer any questions you may have.

Samsung Specialty LCD Displays

Special situations require special solutions. Samsung specialty LCD displays mean you can have a premium-quality display, no matter what your situation requires.

UX(n)-M Series Displays

400UXn-M, 460UXn-M

Compatible with Samsung MID ID Kits (MID40 for 40" displays, MID46 for 46" displays) for easy assembly of video walls. MagicInfo™ Pro-Extension lets users create and control groups of displays over a LAN/WAN.

High Ambient Light Conditions

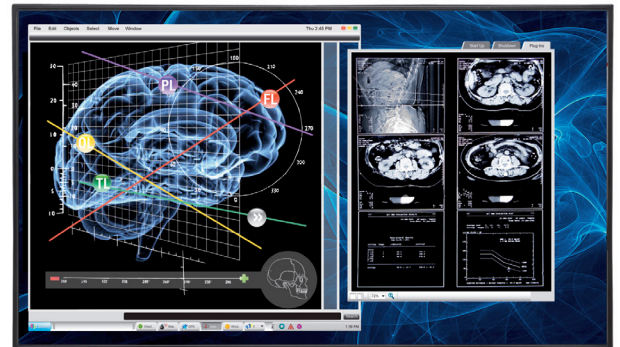

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Marquees, gas pumps, other outdoor signage

Transportation: FIDs, airports, railway and bus stations, fixed highway stations

Financial Exchange: Stock, commodity, currency and other financial exchange establishments

UTn-M Series Displays

460UTn-M

The world's thinnest large-format display bezel, with a gap of just 7.3 mm (.28") from screen to screen. Maintenance is greatly simplified with the Samsung ID2 Kit (MID46-2). MagicInfo™ Pro-Extension lets users create and control groups of displays over a LAN/WAN.

High Ambient Light Conditions

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Marquees, gas pumps, other outdoor signage

Transportation: FIDs, airports, railway and bus stations, fixed highway stations

Financial Exchange: Stock, commodity, currency and other financial exchange establishments

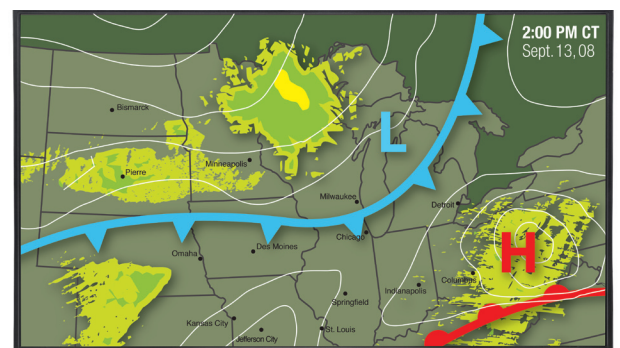

UX(n)-UD Series Displays

400UXn-UD, 460UXn-UD

Samsung UD software allows video walls of up to 250 displays with real-time interactive control of 125 source PCs from a single control PC. Samsung UD software with built-in PC enables gigapixel images to be displayed very quickly. Compatible with Samsung MID ID Kits (MID40 for 40" displays, MID46 for 46" displays) for easy assembly of video walls.

Special Indoor Venues: Weather, military control rooms, large lecture/conference rooms, medical centers where constant, real-time information sharing from multiple feeds is important.

UVending Displays

460i

Interactive and real-time digital signage touch screen panels provide the whole-solution hardware kit. Samsung proprietary MagicInfo™ i software provides the web-based display management solution.

High Ambient Light Conditions

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Retail and other outdoor locations

DR(n) Series Displays

460DR, 460DRn

An LCD panel for the brightest conditions. Its very high brightness levels allow it to be readable even in bright sunlight and high ambient light environments. It allows customers and system integrators to make their own housing.

Outdoors and High Ambient Light Conditions

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Outdoor menus, marquees, gas pumps, other outdoor signage

Transportation: FIDs, multi-use informational displays at airports, railway and bus stations, fixed highway stations

DRn-A Series Display Solution

460DRn-A

A high-brightness touch screen display in a durable, element-resistant, air-conditioned housing. An all-in-one solution for customers who need an outdoor solution right away.

Outdoors and High Ambient Light Conditions

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Outdoor: Outdoor menus, marquees, gas pumps, other outdoor signage

Transportation: FIDs, multi-use informational displays at airports, railway and bus stations, fixed highway stations

TSn Series Displays

320TSn, 400TSn, 460TSn, 700TSn, 820TSn

Integrated touch screen solution features fast, sensitive infrared (IR) technology. 3 mm protective LCD glass panel provides durability in commercial environments.

Indoor Entertainment Venues: Indoor stadiums, auditoriums, digital movie theaters, civic centers, convention centers, museums, parks, hotel lobbies, bars, casinos, clubs

Indoor Retail/Signage/Billboard: Point of Sale (POS) displays or in-store TVs at convenience stores, book stores, movie theaters, quick-serve restaurants, grocery stores, coffee shops, pharmacies, department stores and shopping malls

Transportation: FIDs, multi-use informational displays at airports, railway and bus stations, fixed highway stations

Education: Classroom applications at universities, colleges and other schools

Easier, Larger, More Natural Video Walls

Pyramid

Rectangle

Basic (3x3)

Stair

Samsung's revolutionary interlocking video wall technology, ultra-thin bezels and natural mode feature means fast setup and amazing results. Compatible with UXn-M, UXn-UD and UTn-M displays.

Easy Interlocking Technology

The ease with which you can set up a video wall will impress you nearly as much as the picture quality. With Samsung's ingenious Interlocking Display ID Kits, you can create freestanding video walls of up to four displays high by an unlimited number wide, with no additional support. It's about as easy as stacking blocks. Even multi-sided displays can be set up in under 30 minutes.

And no matter how you configure your video wall, MagicInfo™ Pro-Extension software autosenses the shape and structure, and makes controlling video walls of up to 25 displays through your network a simple drag-and-drop process.

Interlocking connectors sold separately. MID40 compatible only with 40" 400UXn-M and 400UXn-UD. MID46 compatible only with 46" 460UXn-M and 460UXn-UD. MID46-2 compatible only with 46" 460UTn-M.

Natural Mode

Samsung video walls let you display in either Full or Natural mode. Full mode displays the entire picture, just as it is. Natural mode compensates for the bezel width, and displays a natural, distortion-free image over the entire video wall.

Full Mode

Natural Mode

UX(n)-M Series Displays

Thin Bezels and Simple Installation

Samsung UXn-M displays feature thin bezels of just .3" on the 40" displays, and .5" on the 46" displays. Samsung MID ID Kits (MID40 for 40" displays, MID46 for 46" displays) make video wall assembly fast and simple.

Easy Control

MagicInfo™ Pro-Extension software lets users create and control groups of displays over a LAN/WAN.

UX(n)-UD Series Displays

Samsung UD Software

Samsung UXn-UD displays include software that gives you the ability to create a video wall of up to 250 displays, then select and present content from up to 125 source PCs with a single PC, all in real time. You aren't limited to simply scheduling content and letting it run. Samsung UD software also gives you dynamic control, allowing you to zoom in, zoom out, switch images, drag content and control it however you like.

Simple Installation

Samsung MID ID Kits (MID40 for 40" displays, MID46 for 46" displays) make video wall assembly fast and simple.

UTn-M Series Displays

Ultra-Thin Bezels for Virtually Seamless Video Walls

Samsung UTn-M displays feature the world's thinnest large-format display bezels. The top and left side bezels measure .16" while the bottom and right side bezels measure just .09". The total distance from the picture in one display to the picture in the next display is just .28". Video walls are virtually seamless.

Video Walls that Curve

The Samsung MID46-2 ID Kit allows simple installation, and allows video walls to bend forward up to 40° between displays.

Improved Reliability, Easier Maintenance

Upgraded air venting in the Samsung UTn-M display improves cooling, which increases component life. The Samsung ID2 Kit also enables the back cover to be easily removed for servicing, without having to disassemble any part of your video wall.

Group Control

With MagicInfo™ Pro-Extension software, users can create and control groups of displays over a LAN/WAN.

Touch

Touch Screen Displays Connect
with your Audience

Deliver a message your audience can touch. Samsung TSn series touch screen displays add a level of detail and engagement that typical displays can't offer.

Sensitive, Fast and Durable

Infrared (IR) technology enhances sensitivity for easy consumer operation. The 15 to 40ms response time is one of the fastest in the industry. And the 3mm thick protective glass panel ensures reliable operation for years to come.

Built-in Speakers

Two high-powered 10W speakers add an extra dimension of functionality, without having to buy and mount external speakers. The deep, rich sound your audience hears will complement the HD image they see.

Convenient Networking Capability

TSn series touch screen displays feature built-in PCs for easy networking. Content control is as easy as a few clicks of the mouse. And you can even create touch screen video walls with the built-in RS-232C connection.

XS, S, M, L, XL

The right size for the right message. TSn series touch screens include the 32" 320TSn, 40" 400TSn, 46" 460TSn, 70" 700TSn and 82" 820TSn.

SAMSUNG

High Brightness Outdoor Solutions

Communicating with people means communicating with them wherever they are. And sometimes they're outside. Samsung DR/DRn series outdoor displays and DRn-A all-in-one solutions offer high performance, even in outdoor environments.

Extra-Bright Visibility

DR/DRn/DRn-A outdoor displays feature extremely high 1500 nits brightness on the 46" display, and 2000 nits on the 70" and 82" displays. Combined with the 3500:1 contrast ratio, your message will be sharp and visible, even on bright sunny days.

70" and 82" display coming early 2009.

DR/DRn Customizable Solution

The Samsung DR/DRn displays offer a high-brightness panel only that can be integrated into your own system. Add your own housing, bezel, air conditioning or whatever else you may need.

DRn-A All-In-One Solution

The DRn-A display offers the same high-brightness panel, along with touch screen functionality, a professional-grade air conditioning unit and a sleekly designed, durable, elements-resistant housing. This complete solution is engineered to withstand high temperatures, low temperatures, high humidity, dust, rain and snow, and always operate at peak performance.

Touch Screen Functionality Outside

The Samsung DRn-A all-in-one outdoor solutions give you all the features of our touch screen displays: touch screen functionality, speakers and protective glass.

Easy Network Control

Samsung DRn and DRn-A displays offer network connectivity. You can easily update content over your LAN/WAN.

Security Features

The shock sensor and camera included in our DRn-A solution provide an added measure of security.

Vending Machine Displays:
Your Electronic Sales Force

Think how much more product you could sell if you could personally deliver your sales message at every vending machine location. Samsung vending solution touch screen displays make it possible.

Increased Possibilities

With Samsung vending machine displays, you have an opportunity to deliver a sales message. With an incorporated sales message, you can demonstrate more advanced products, and sell higher-margin products like MP3 players, cell phones and digital cameras. Advertising messages selling third-party products and services can also be incorporated, resulting in an additional revenue stream.

Drag & Click

Wheel

Double-Click

Touch Screen Functionality

Your message can be interactive. Samsung vending machine displays incorporate touch screen functionality, inviting immediate customer response to your message.

Samsung DID Panel

Samsung vending machine displays incorporate our proprietary DID panels. Featuring innovative cooling technologies, these advanced displays offer you the advantage of longer hours of operation.

Built-in Speakers

Messages should be seen, as well as heard. Built-in speakers add another level of appeal to your sales messages, and another way to attract attention.
